

I'm a new XM Satellite Radio subscriber and recently heard about NAB's attempts to block traffic & weather on XM radio. As you are aware, as a subscriber, I pay a monthly fee and expect services such as weather and traffic to be aired without interruption from the FCC. XM Satellite Radio is a service just like cable TV. We pay a fee in order to select what we listen to. Please reject NAB's petition 04-160 and let the subscribers of XM Satellite Radio choose what they want to listen to. Thank you for your attention to this matter
